

DriverAdvisor[®] Monitoring

Easily keep track of changes in your drivers' motor vehicle reports (MVRs) as they happen

With DriverAdvisor[®] Monitoring, you're alerted any time there's new activity reported on the driving record of any one of your monitored drivers. The length of your risk period shrinks from 12 months to just one, and DriverAdvisor Monitoring automatically orders the MVR(s) you need.

What's more, DriverAdvisor Monitoring can help you trim expenses at annual review time. If you've ordered an MVR on a driver through DriverAdvisor Monitoring, you won't have to order another on that driver for a full year.

Don't let unknown driving violations and changes in license status between review periods have detrimental effects on your business.

With alerts from DriverAdvisor Monitoring, you learn of MVR changes more quickly, so you can take appropriate actions to reduce driver liability before it causes real problems.

Without DriverAdvisor Monitoring

With DriverAdvisor Monitoring

You can use DriverAdvisor Monitoring delivered through ExpressNet or with our DriverSafe® Plus web platform.

When you use DriverAdvisor Monitoring with DriverSafe Plus, you get a proprietary, easy-to-read, side-by-side comparison of the previous and current MVRs for drivers with detected activity. Changes are highlighted, saving your staff the time and effort of sorting through piles of MVRs, looking for a needle in a haystack.

Armed with this timely information, you can take immediate action to:

- improve safety
- make quicker employment decisions
- reduce your risks

Take your risk management to the next level

Our DriverSafe Plus web platform offers a comprehensive suite of analytic tools you can use to effectively manage risk across your entire fleet. Now you can track critical information, including license type, expiration date, and status and medical certificate expiration, in addition to violation data.

With a few clicks of the mouse, you can easily perform analysis that can help you:

- address factors creating the most liability
- identify underperforming employees
- recognize and retain high-performing employees

The image shows two side-by-side 'CURRENT MVR' and 'PREVIOUS MVR' reports for a driver in Maine. The reports are from iiX and include the following sections:

- DRIVER INFORMATION:** Name (MARRY BANDER), License Number (00292010), License Class (C), License Status (A), License Expiration (09/28/2010), License Issued (09/29/08), License Active (DESC: ACTIVE), License Description (DESC: OPERATOR), License Restrictions (DESC: NONE), License Endorsements (DESC: CORRECTIVE LENSES).
- MISCELLANEOUS AND STATE SPECIFIC INFORMATION:** Requested as: KAYLEE, License: 5661524.
- DRIVING RECORD HISTORY:** Shows violations such as 'SPEEDING 71 MPH IN A 55 MPH ZONE' with a 6-point penalty.

Highlighted changes between the current and previous reports include the driver's name (MARRY BANDER), license number (00292010), and the driving record history.

Highlighted changes make it easy to compare MVRs.

Driving Decisions for Your Business.
