## Risk Management Portal: Be Prepared for a Computer Attack

### Cyber Criminals Act Without Warning

Can you afford to lose access to critical business data and systems? In today's digital and interconnected world, every organization relies on data and on the networked computer systems upon which data resides. Some organizations rely on data, systems and their connection to the internet as their primary means of conducting business. For others, data and systems play an important support function within the organization. No organization can afford to lose important data and systems while still functioning at an optimal level. Cyber criminals act without warning and the data and systems losses from computer attacks -- including significant out-of-pocket recovery costs and organizational downtime -- can be devastating.

### Immediate Access to Risk Management Tools

As part of our Cyber Suite coverage we offer an online cyber risk portal that equips you with risk management tools to help you plan and be prepared should a computer attack happen to your company. There's no cost; it's a complimentary service for our Cyber Suite insureds.

It's called eRiskHub<sup>®</sup> and it's designed to help you better understand your risks and establish a response plan so you can manage the costs and minimize the effects of a data breach should one occur. With a response plan and instant access to informative resources you'll be ready to more efficiently and cost-effectively respond to and recover from a computer attack.

### Key Features of the eRiskHub<sup>®</sup> Portal

Knowing how to protect yourself against cyber attacks and breaches is important. The eRiskHub<sup>®</sup> assists with planning and preparing for a cyber attack or breach. Some of the highlights of having the eRiskHub<sup>®</sup> include:

**Cyber Risk Tools:** Test your security knowledge with a self- assessment or a cyber protection survey.

**Business Interruption Cost Calculator:** Use the cost calculator to explore how much a potential breach could cost and impact your business.

**Incident Roadmap:** Follow a step-by-step process and use valuable checklists in the event of a data breach.

**Cyber and Privacy News:** Stay informed by catching up on the latest cyber news stories and articles from security experts.

**Resources:** Find the latest data on security breaches with downloadable articles and videos on data, security, insurance and risk management trends.

**Training:** Understand how hackers can infiltrate a system with cyber security information to use in your business or find vendors that have training available for your employees.

In today's digital world, no organization is safe from devastating breaches and computer attacks. Keep yourself informed and be prepared. Assess your risks and develop an effective response plan with the eRiskHub<sup>®</sup>.
